Honoured Chairs,

Estonia wishes to thank chairs for facilitating a very long draft editing session. To reiterate Estonia's comments which may not be reflected in the main document, we shall send them in writing:

1. Estonia proposed to add the words „and preparedness” after „disaster risk reduction” throughout the document, where appropriate. This means making the addition in all instances except where the aim is to specifically exclude preparedness measures for some reason (in order to address risk reduction specifically and exclusively).
2. Estonia also supports EU and Canada proposals to delete 18 bis and 19/4 bis additions proposed by Egypt.

Thank you,

Iivi Luuk

Rescue and Crisis Management Policy Department

Estonian Ministry of the Interior
